

WHOA BIG MULE - WHOA!

Winter means ice, snow, or sleet on the runway you're trying to stop on. John Dorcey, Wittman Field Airport Manager, is a pilot and ops manager who uses computer aided braking action equipment. John would love to share with you what is critical to know about runway braking. ATC is doing it again. They're changing the phraseology and taxiing procedures. What you need to know about communicating with ATC.

Directions: The FAA Safety Center is located adjacent to the new Oshkosh Air Traffic Control Tower.

A message from the National FAASafetyTeam Manager

The new WINGS—Pilot Proficiency Program is great! Check it out now!
